ABOUT US

Vertex Structures, an industry leader, has been providing weatherproof, corrosion and rot-resistant fiberglass shelters for over 50 years, with 3,000+ shelters installed worldwide. From the Arctic to the Equator, our shelters ensure your vital equipment can withstand the most punishing environments. Our dedication to our customers and our quality drives us to create reliable, customized solutions—all proudly made in the USA.

CORE COMPETENCIES

PORTABLE & LIGHTWEIGHT

Shelters can be transported by rail, trailer, barge, or airlifted
Slim shelter design exists for container shipping

CUSTOMIZED SOLUTIONS

Tailored solutions to meet unique project requirements

DURABLE & ROBUST

Greater strength to weight ratio than steel and will last for decades with virtually no maintenance

DIFFERENTIATORS

CORROSION & ROT-RESISTANT

Ideal for salt or freshwater environments

ZERO-SEAM FABRICATION

One-piece molded fiberglass for unyielding resilience in all weather conditions

150+ MPH WIND LOADS

Standard design can withstand hurricane force winds of 150 mph, with higher loads attainable

FIRE RETARDANT

Fire retardant resin meets ASTM E84 Class II Rating
Foam meets UL94HF-1 Horizontal Flame requirements

R-VALUES

Standard R-Values up to 26

FAA

Provided over 800 equipment shelters for the FAA since opening in 1973, with a significant number of them still in use today.

US NAVY

Designed and manufactured 31 steel shelters to house radar equipment, meeting stringent EMI requirements. Produced 24 fiberglass shelters to house navaid equipment.

NOAA

Provided over 30 shelters to house hydrogen generators and weather ballon monitoring equipment.

US ARMY

Provided multiple equipment shelters for both US and international locations.

US COAST GUARD

Preferred vendor for US Coast Guard Rescue 21 for our shelter's ability to withstand Alaska's harsh climate. Recent projects include Kodiak and Hinchinbrook, AK.
